I JLGB as an alternative to JGB

1

II Safety of JLGB

Appendix

I JLGB as an alternative to JGB

The type and issue amount of the JLGBs and JFM's Bonds (FY2015)

	Denominated in JPY	Denominated in foreign currency		
JLGBs	LGB <jpy 5.2="" trillion=""> ≒USD 50.5 billion Joint local government bond <jpy 1.4="" trillion=""> ≒USD 13.8 billion</jpy></jpy>	Tokyo Met. <usd 1="" billion=""></usd>		
JFM's Bonds	$\langle JPY 1.4 trillion \rangle \Rightarrow USD 13.7 billion$	<usd 1.5="" billion=""></usd>		
Total	$\langle JPY 8.0 trillion \rangle \Rightarrow USD 78.0 billion$	<usd 2.5="" billion=""></usd>		

※[Reference] Issue amount of JGB (FY2015) : JPY 167 trillion ≒ USD 1,616 billion

Note : USD 1 = JPY 103.18 as of 31 August ,2016

JIC I JLGB as an alternative to JGB (diversity of JLGB)

 A lot of LGs successfully issue public offering bonds underpinned by the solid creditworthiness supported by the local public finance system.

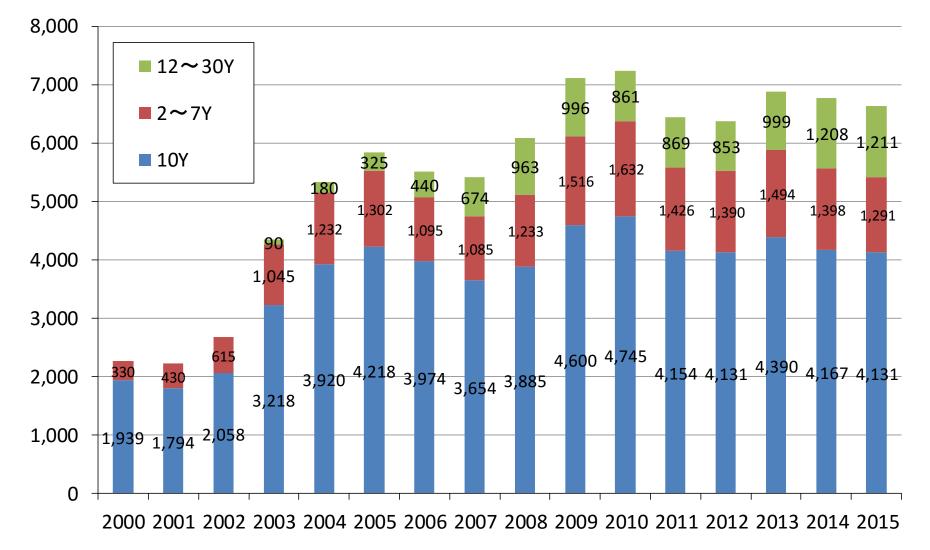

- 55 LGs issue public offering bonds in FY 2016.
 - ▶ 35 prefectures (shown in black)
 - ► 20 designated cities (shown in red)

JIC I JLGB as an alternative to JGB (diversity of JLGB)

(Unit: billions of JPY)

1. Solid support by the central government on redemption

2. Check and control system by the central government

3. Control of fiscal discipline

<u>Principal and interest of JLGB have been fully paid</u> without default (similar to JGB).

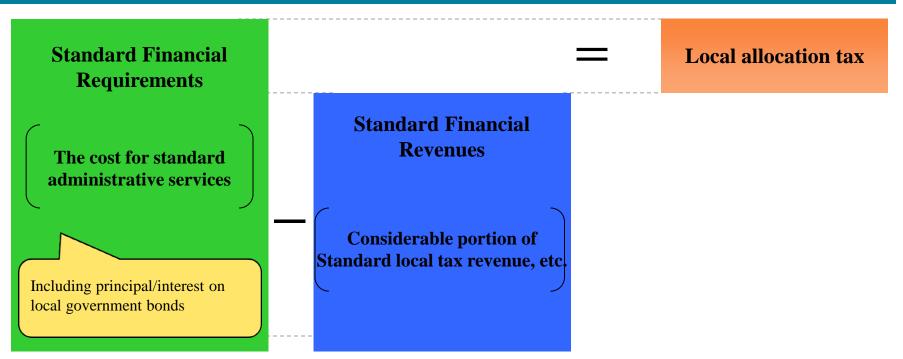

II -1 Solid support by the central government on redemption

The central government secures revenue sources required for principal/interest payment on local government bonds through the local public finance system.

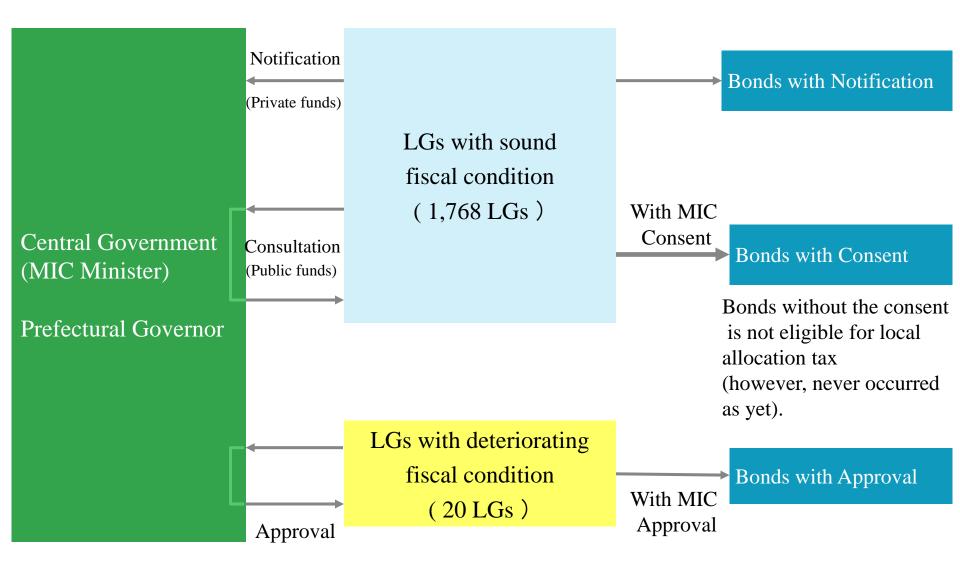

In particular, it is secured through local allocation tax each local government receives from the central government to provide basic social capital and standard administrative services to citizens.

The principal / interest on JLGB is included in the standard fiscal demand amount when calculating local allocation tax.

The local allocation tax system has functioned for over 60 years since 1954. The amount of the local allocation tax is around 17 trillion yen.

II -2 Check and control system by the central government

Note: LGs are classified by the fiscal conditions etc.

The numbers of LGs is FY2016

II-3 Control of fiscal discipline

Sound stage

Establishment of fiscal indicators and thorough disclosure

- Real deficit ratio
- Consolidated real deficit ratio
- Real debt payment ratio
- Future burden ratio
- Funding shortfall ratio
- →Reported to the assembly with auditor inspection attached and publicly announced.

Early warning

Achieving fiscal soundness through independent improvement efforts

- Formulation of fiscal restoration plan (needs approval by the assembly), obligatory request for external auditing.
- The progress of implementation the plan is required to be reported to the assembly and publicly announced every fiscal year.
- If the early achievement of fiscal restoration is deemed to be strikingly difficult, MIC Minister or the prefectural governors make necessary recommendations for policy change.

Reconstruction

Definite reconstruction through involvement of the central government.

- Formulation of financial reconstruction plan (needs approval by the assembly), obligatory request for external auditing.
- The fiscal reconstruction plan can be sought for consultations and agreement from MIC Minister.
- If fiscal management is deemed not to conform with the plan, certain actions such as budget changes, etc. are recommended by MIC Minister.

Early warning limit

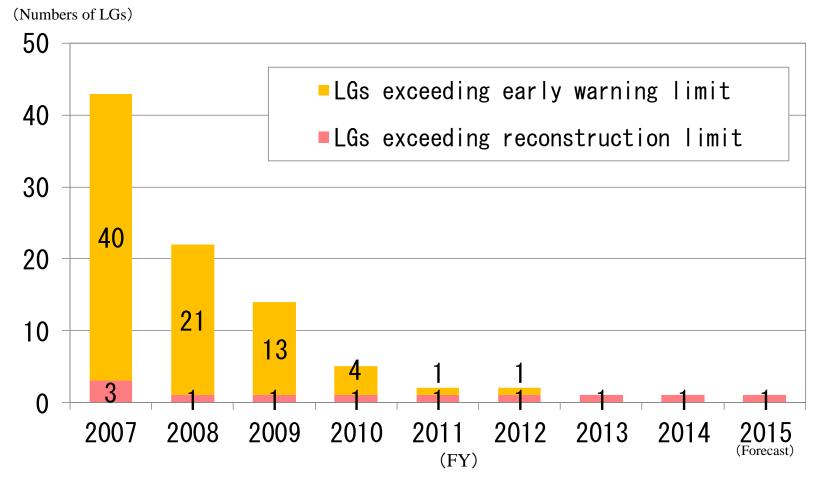

Reconstruction limit

Sound fiscal condition

Financial deterioration

II -3 Numbers of LGs exceeding early warning limit

In recent years, the numbers of LGs exceeding early warning limit have decreased.

Appendix

Functions of LGs

Share of Expenditures by Purpose of Central and Local Governments (final expenditure based) Local 58.3% Central 41.7% 99% 1% Sanitation expenses 3.7% Public health centers, garbage disposal, etc. 12% School education expenses 8.9% 88% Elementary and junior high schools, kindergartens, etc. Judicial, police, and 21% 4.0% 79% fire service expenses 75% 25% Social education 2.8% Community centers, libraries, museums, etc. expenses, etc. Public welfare expenses (excluding pension expenses) 21.0% Child welfare, elderly care and welfare, public assistance, etc. 70% 30% 27% Land development expenses 8.4% 73% Urban planning, roads and bridges, public housing, etc. 34% Land conservation expenses 1.5% 66% Rivers and coasts **Commercial and** 65% 35% 5.0% industrial expenses Disaster recovery expenses, 7.4% 26% 0.6% etc. 37% 63% Debt services 21.4% Agriculture, forestry and 1.7% fishery expenses 48% 52% 1.7% Housing expenses, etc. 49% 51% Onkyu pension expenses 0.3% 96% 4% Pension expenses 100% 6.4% (of public welfare expenses) 100% Defense expenses 3.0% General administrative 81% 19% 7.7% Family register, basic resident register, etc. expenses, etc. 100% Other 1.8%

 LGs have relatively large responsibilities & functions.

The greatest portion of local government annual expenditures is directed toward supporting everyday public services: public health and sanitation, education, social education, and police and fire prevention, etc.

Source: White Paper on Local Public Finance, 2016 "FY2014Settlement" by Ministry of Internal Affairs and Communications

The revenue of LGs comes mainly from local taxes, local allocation tax, national treasury disbursements, and local bonds.

Check and control system by the central government

- Local governments (LGs) are required to consult with, or notify the Minister of MIC (or the prefectural governor) at the time of issuance of Local Government Bond (LGB).
- LGB issuance without the consent of the Minister of MIC (or prefectural governors) is not eligible for public funds nor for local allocation tax system (Although LGs can issue LGBs without the consent, there are no such case.).
- In addition, LGs with deteriorating fiscal conditions are required to obtain an approval of the Minister of MIC (or the prefectural governor) in their issuance. LGB issuance without the approval shall not be issued in this case with LGs with relatively weak fiscal conditions.
 - O The central government (or prefectures) check all the LGBs.
 O The central government secures the redemption of LGBs as a form of a consent.
 - **O** Issuance of LGBs by LGs with deteriorating fiscal conditions is restricted. (the number of LGs necessary to obtain the approval FY2015: 20(total LGs : 1,788))

Consultation system for the issuance of JLGB

 JLGB system changed from approval system to consultation system in FY2006 due to decentralization. Moreover, notification system was introduced in FY2012 limited to Private Fund from the perspective of enhancement of LGs' autonomy.

1. Consultation

LGs are required to consult with, or notify the Minister of MIC (prefectures and government designated cities) or the prefectural governor (municipalities) before debt issue.

2. Allocation of public funds for LGB with the consent

Only LGB with the consent by the Minister of MIC or the prefectural governors may borrow public funds [Government funds, JFM funds].

3. Debt payment for bonds with the consent included in Local Allocation Tax system

Debt payment for LGBs with the consent by the Minister of MIC or the prefectural governors is included in Local Allocation Tax system.

4. LGs are required to report issuance of the bond without the consent to the assembly

In order to issue LGBs which need consultation without the consent, the head of the LG is the required to report issuance of bond without the consent to the assembly.

5. Standard for consent

The Minister of MIC releases the standard for the consent every fiscal year. Issuers in high deficit, issuers with high real-debt-payment-ratio, and public enterprises in high deficit, etc. are required to obtain the approval of issuance from the Minister or the governor.

Consultation system for the issuance of JLGB (2)

• In order to secure fiscal soundness, LGs with higher real-debt-payment-ratio or higher deficit than a set limit are required to get the approval for bond issue instead of the consultation.

Approval required if real-debt-payment-ratio(RDP) is 18% or more LGs with sound fiscal condition

◆ Issuers with RDP under18% must consult with, or notify the MIC minister (or the prefectural governor) before debt issue.

◆ Issuers with RDP between 18% ~ 25% must draft the debt management plan and obtain the approval of the MIC minister (or the prefectural governor), based upon the general approval standard.

◆ Issuers with the ratio between 25% ~ 35% must draft the financial soundness plan required by law and obtain the approval of the MIC minister (or the prefectural governor), based upon the general approval standard.

• Issuers with the ratio of 35% or more must draft the financial rebuilding plan and obtain the approval of the MIC minister. Otherwise, Issuers are prohibited from debt issue excluding disaster rehabilitation projects, etc.

Bonds are expected to obtain the consent on the general rule announced in advance.

Even if their bonds are not consented, they may issue bonds. (In case of bonds which need consultation, they are required to report it to the

assembly. LGs of Issuance with Approval

Bonds are expected to be approved on the general rule announced in advance if their debt management plans are proper.

LGs of Issuance with Approval

Bonds are expected to be approved on the general rule announced in advance if their financial soundness plans required by law are proper.

LGs of Limited Issuance with Approval

Bonds may be limited excluding disaster rehabilitation projects, etc.

25%

■ 35%

Control of fiscal discipline

- In Japan, there is a system of maintaining fiscal discipline by checking the fiscal conditions of LGs through the disclosure of relevant information, and taking measures for early-stage improvement of fiscal conditions before they seriously deteriorate.
- Under this system, local residents, local assemblies and auditors are to examine latent risks of relevant local public corporations and third-sector companies in addition to LGs.
- These examinations are designed to confirm both flow and stock indicators from the perspective of ensuring the medium- and long-term improvement of fiscal management.
- In addition, if the rehabilitation by LGs on their own is deemed difficult, the central government will play a role to ensure their rehabilitation.

OThe fiscal conditions of local governments are checked in detail in terms of both flow and stock.OThe fiscal conditions of related entities are also checked in order to prevent unforeseen liabilities.OAs of the end of FY2015, only 1 LG exceeds the early warning limit, and this LG exceeds the reconstruction limit(out of a total of 1,788 LGs).

Control of fiscal discipline (2)

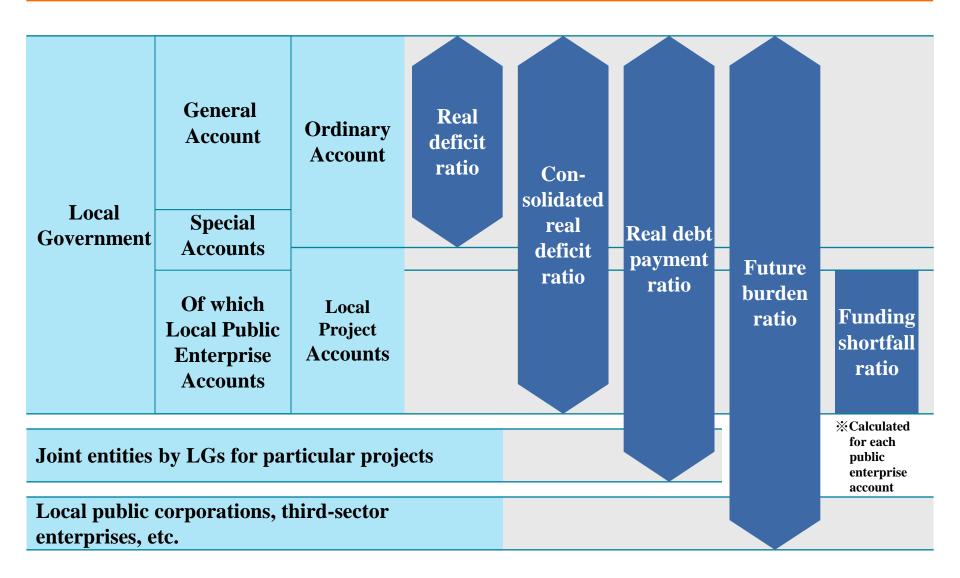

• LGs are required to report the following ratios to the local assembly every fiscal year after receiving an assessment by the auditor, and to disclose those ratios to the public.

Fiscal indicator	Definition
1. Real deficit ratio	The ratio of deficit to the standard financial scale.
2. Consolidated real deficit ratio	The ratio of consolidated deficit in the all accounts to standard financial scale.
3. Real debt payment ratio	The ratio of debt payment by general revenue to standard financial scale.
4. Future burden ratio	The ratio of outstanding debt as well as contingent liabilities of public enterprises and government affiliates, to standard financial scale.
 Funding shortfall ratio at Public Enterprises 	The ratio of the previous fiscal year's shortfall in funds for each public enterprise to the previous fiscal year's business scale.

Limits for Early warning and reconstruction

	Early warn	ing limit	Reconstruction	on limit
	Prefectures:	3.75%	Prefectures:	5%

5. Funding shortfall ratio at public enterprises	20)%		

Scope of fiscal indicators in the Law

Revision of consultation system for the issuance of LGB

 Notification system for the issuance of LGB was introduced from FY2012 by revising the part of consultation system in order to enhance the independence and autonomy of LGs.

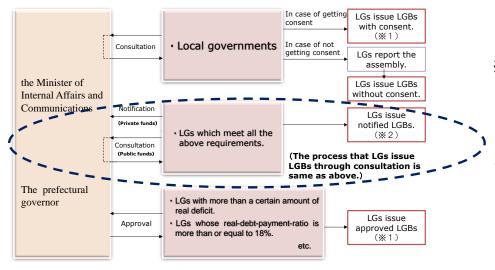

1. Conditions of LGs that don't need consultation when they issue LGBs

If they meet the following requirements, LGs can issue LGBs^{*} without the consultation with the Minister of Internal Affairs and Communications or the prefectural governor. *LGBs by private funds only.

- ① Real debt payment ratio is less than 18%.
- 2 Real deficit is 0.
- 3 Consolidated real deficit ratio is 0.
- ④ Future burden ratio is less than 400% (prefectures and government designated cities) or 350% (municipalities).

2. Local Allocation Tax system

Debt payment for notified LGBs which are approved that LGs could issue with the consent if they consult with the Minister of Internal Affairs and Communications or the prefectural governor is included in Local Allocation Tax system.

- *1 LGBs with the consent(or the approval) are approved to be allocated public funds and debt payment for LGBs with the consent(or the approval) is included in Local Allocation Tax system.
- 2 Debt payment for notified LGBs which are approved that LGs could issue with the consent if they consult with the Minister of Internal Affairs and Communications or the prefectural governor is included in Local Allocation Tax system.
